Experience

Trustly

Remote

Backend Software Engineer

May 2026 – Present

- Provide technical leadership for the Backoffice team, combining hands-on backend development with technical strategy and architectural decision-making for merchant-facing and internal payment platforms.
- Lead technical discovery, transforming ambiguous problems into scoped, executable engineering plans, and drive modernization of legacy platform components.
- Delivered critical-priority security remediation across merchant authentication flows (login, password-reset) and diagnosed production data-integrity issues via log analysis.
- Tech: Java, Spring Boot, Golang, Node.js, TypeScript, PostgreSQL, MongoDB, MySQL, RabbitMQ, AWS, Docker, Microservices

PagoNxt (a Santander company)

Remote

Backend Software Engineer

Dec. 2022 – May 2026

- Built and maintained backend APIs and integrations using Golang and Node.js for a high-availability fintech platform processing over \$90B in annual transactions, supporting enterprise clients including Amazon.
- Investigated complex production and integration issues involving authentication, sessions, retries, and API failures through log and network-level analysis, improving system reliability.
- Developed asynchronous processing pipelines using RabbitMQ and event-driven architecture, maintaining end-to-end data consistency across distributed services.
- Tech: Golang, Node.js, TypeScript, MongoDB, MySQL, RabbitMQ, Docker, AWS

Alubar

Belém, PA

Product Engineer

Mar. 2021 – Dec. 2022

- Developed backend systems and API integrations for process automation, building data extraction and automation solutions interacting with web-based systems.
- Investigated API communication issues and system failures, optimizing PostgreSQL, MySQL, and MongoDB workflows and schemas.

Equatorial Energia

Belém, PA

Software Engineering Intern

Oct. 2019 – Mar. 2021

- Developed monitoring dashboards and automation solutions, supporting system architecture design and technical documentation.
- Participated in Agile ceremonies and contributed to modernizing legacy processes with structured documentation.

Education

Fundação Getulio Vargas – FGV

Belém, PA

MBA in Project Management – Agile Methodologies specialization

Dec. 2022

- Focus areas: Stakeholder Management, Scrum, Budget Control, Risk Management, PMBOK, Conflict Resolution, and KPI-driven Decision Making.

Federal University of Pará – UFPA

Belém, PA

B.Sc. in Electrical Engineering – Software Engineering specialization

Feb. 2021

- Collaborated with cross-functional teams to develop automation solutions; volunteer tech instructor teaching computer literacy to seniors and underprivileged children.

Projects

Cliniq

Personal Project

- SaaS platform for healthcare professionals (doctors and psychologists) to manage consultations, subscription billing, and financial performance analytics.
- Technologies: Node.js, Express, MongoDB, Stripe, Google OAuth, Jest, Docker

Hexagon Boilerplate

Creator & Maintainer

- Reusable Node.js starter kit implementing Hexagonal Architecture with dependency injection, JWT authentication, database connectivity, and a complete CRUD module following clean code best practices.
- Technologies: Node.js, Express, MongoDB, JWT, Awilix, Docker

BoilerplateGO

Creator & Maintainer

- Go microservice starter with production-grade observability (Prometheus metrics, Grafana dashboards, centralized logging via Loki/Promtail) and Kubernetes manifests (Deployments, HPA, ConfigMaps, Secrets, RBAC).
- Technologies: Go, Docker, Kubernetes, Prometheus, Grafana, Loki, Redis, MongoDB, GitHub Actions CI/CD

Tools & Technologies

Languages & Frameworks: Java, Golang, JavaScript, TypeScript, Python, Spring Boot, Node.js, Express.js

Architecture: Distributed Systems, Microservices, Event-Driven Architecture, System Design, Clean Architecture, Design Patterns

Databases & Messaging: PostgreSQL, MongoDB, MySQL, Redis, RabbitMQ, Kafka

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD

Reliability & Quality: Unit & Integration Testing, TDD, Code Review, Production Debugging, Observability

Technical Leadership: Architecture Decisions, Technical Discovery, Engineering Standards, Security Remediation, Cross-functional Collaboration

Tools & Practices: GitHub, GitLab, Agile/Scrum, Cursor, LLM-assisted Development

Languages: Portuguese (Native), English (Advanced – C1)
